

❖ UI elements:

✚ **Input Controls:**

- Input controls allow users to input information into the system.
- Checkboxes, Radio buttons, dropdown lists, list boxes, buttons, toggles, text fields, date fields.

❖ **Dropdown list/menu:**

- Dropdown list/menu is a graphical control element, similar to a list box, that allows the user to choose one value from a list.
- They allow you to collect predictable input.
- I used dropdown menu on FARMIE home page, All user dashboards(Farmer/customer/transporter/admin/retailer) to page selection purpose.

❖ **Radio buttons and Checkbox:**

- **Radio buttons** and **checkboxes** are used for selection purpose.
- Radio button is used for single option selection from options and checkbox is used for select one or more options form option list.
- In **FARMIE** system I used **Radio buttons** and **checkboxes** in Registration pages.

❖ **Buttons:**

- I used to many buttons for clicking purpose.
- In FARMIE by clicking buttons user can go on another page.
- Also I used some other buttons like submit ,login, logout, update details etc purpose.

✚ **Navigation Components:**

- Navigational components help users move around a product or website. Common navigational components include slider, search field, pagination, slider, tags, icons.

❖ **Search field:**

- I used Search field is on Home page of FARMIE to searching purpose.

❖ **Slider:**

- Slider also used on FARMIE home page to slid image and FARMIE slogan.

❖ **Navigation Bar:**

- This provide responsive and attractive look to the Homepage/Dashboard.
- Also this is used for Menu list in navigation bar.

Informational Components:

- Informational components share information with users. Tooltips, icons, progress bar, notifications, message boxes, modal windows.

❖ **Alert box:**

- I used alert box for navigate alerts, notification, confirmation purpose.
- In FARMIE system after successfully logged-in we see alert box with “You are successfully logged in now” message .
- Also after successfully logout we see alert box with “Logout successfully” message.

❖ **Confirm box:**

- Also I used confirmation message box for confirming something for user.

❖ **Tables:**

- Data views in tabular format.
- It Looks very catchy and attractive also it very easy to understand content/data.
- In table data Properly align on webpage.
- E.g : manage_product, manage_farmers, manage_orders are the pages where I used table as informational component.

❖ Inputs:

- Bootstrap provide many inputs like input, textarea, checkbox, radio, select.
- Input tag/fields are Used to get the information from user.
- In **FARMIE** system there are several registration, login forms, product order form, add product form etc
