♣ *Roles & Responsibilities:*

♣ **Name Of member**	♣ **Roles**	♣ **Responsibility**
Pankaj	*Designer*	*Design Front-End View and UI/GUI as per customer requirements.*
Saurabh & pankaj	*Developer/ Programmer*	*Designing and creating software programs, integrating systems and software.*
Pankaj	*Data Analyst*	*Gather actual required data ,information's for system and make*
Saurabh & pankaj	*Planner*	*Plan, coordinate and monitor activities of system to develop and implement processes and system.*
Pankaj	*Tester*	*Execute all levels of testing for make bug free system.*
Saurabh & pankaj	*Documentation*	*make project report for make sure that project requirements and fulfilled and to establish traceability concerning what has been done and who has done it.*
Pankaj	*Database Management*	*Manage all type of tables and databases required for system*
Saurabh & pankaj	*Demo/Presentation*	*Present a project demo in front of teacher and guide.*

🎙️ *Data Collections:*

Processes	Registration forms /System forms	Checklist	Interviews	Market Research	Questionnaires & surveys	Feedback forms
Gather farmers problems			✔	✔	✔	
Gather Problem Solutions			✔		✔	
Identity stakeholder		✔		✔	✔	
Identity risks		✔	✔	✔	✔	
Plan risk responses		✔		✔		
Gather Farmers Information	✔					
Gather Customer Information	✔					
Get Product Details	✔					
Order details	✔					
System Feedbacks						✔

🞣 *Implementation:*

Sr.No.	Task	Process	Status
1.	Hardware setup	Laptop min 4GB Ram, 500GB hard disk with windows 10	Done
2.	Software setup	Install latest Google Chrome 10+ Browser, WAMP Server 2 and Sublime Text Editor/Visual Studio	Done
3.	Create Database	Create Database on Wamp Server	Done
4.	Design Front-End view	Design Home ,Contact & about Pages	On Going
5.	Design Forms & Pages	Design Registration forms for Farmer, Customer, Retailer and login form for same. Also create Add product and order product pages.	On Going
6.	DB Connection & Table Creation	Perform Database connectivity and create tables.	Remaining
7.	Develop System Modules	Develop system modules like registration, login, manage product, manage product orders, and send feedback to system.	Remaining
8.	Perform Initial Testing	Start Initial Testing for Farmie system	Remaining
9.	Correct Issues Found	Document errors, bugs in system and correct it.	Remaining
10.	Perform Final Testing	Perform final testing	Remaining
11.	Demo	Demonstrate the Farmie system in front of project guide/stakeholders	Remaining
